

## **Biography**

### **Martin Gibson**

Board Member, representing Accel

Martin has been active in international technology start-ups and venture capital for 19 years and focuses on the communications and semiconductor sectors.

Prior to Accel, Martin was a Partner at Atlas Venture in London where he invested primarily in communications and semiconductor businesses for 9 years. Whilst at Atlas Venture Martin sat on the boards of DisplayLink, Phyworks (acquired by Maxim), Azea Networks (acquired by Xtera), and Zinwave. He also worked closely with Orthogon Systems (acquired by Motorola), Icera Semiconductor, Ubiquisys, Radioscape and Xelerated.

Previously, he was a general manager and consultant at Scientific Generics, a business & technology consulting firm, focused on technology-driven commercial products. Earlier in his career, while at start-ups Cellstack and Madge Networks, he led the development of video and data communications products for enterprise markets. He also worked within ANSI and the ATM Forum defining new communications standards.

Martin has an MBA from Cranfield School of Management, an BA in Electrical & Information Science from Cambridge University and qualified as a Chartered Engineer.
